QUESTION BANK

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

SUBJECT: OBJECT ORIENTED SOFTWARE ENGINEERING

SUBJECT CODE : CS802 (D)

SEMESTER : VIII

UNIT-1

Q.1 Discuss the essence of software development life cycle. Describe various phases of software development life cycle model. **CO1**

Q.2 What do you mean by software process? What is the difference between methodology & Process? Explain with suitable example. **CO1**

Q.3 What is prototyping? Explain the advantages of first developing the prototype of a software. **CO1**

Q.4 Why is it important to adhere life cycle model while developing a large software product? **CO1**

Q.5 How prototype model solve the problems over the waterfall model? **CO1**

Q.6 What are the features of object oriented concept in software engineering? **CO1**

Q.7 Define model architecture. What is the purpose of the architecture model? **CO1**

Q.8 List out the pros & cons of waterfall model of software development. **CO1**

Q.9 what are the characteristics to be considered for a selection of a life cycle model. **CO1**

Q.10 Describe the evolutionary process model and the model that make use of existing component with example. **CO1**

UNIT-2

Q.1 What is the Rational Unified Process? Methodology and Tools. Explain in detail. **CO2**

Q.2 Define the phase of rational unified process. **CO2**

Q.3 What are the Symptoms and Root causes of Software Development Problems. **CO2**

Q.4 What are the six best practices of rational unified process? **CO2**

Q.5 What is the 4 +1 View Model as it relates to system modelling? **CO2**

Q.6 The RUP is normally described from three perspectives-dynamic, static & practice. What does perspective do? **CO2**

Q.7 Which phase of the RUP is used to establish a business case for the system? **CO2**

Q.8 Define Software Process Workflows. Explain in detail. **CO2**

Q.9 Writes advantages & disadvantages of RUP model. **CO2**

Q.10 Explain different layers of Software development. **CO2**

UNIT-3

Q.1 How to define relationship in Unified Modelling Language. Explain in detail. **CO3**

Q.2 What do you mean by object oriented analysis? Explain with an example. **CO3**

Q.3 Write the difference between traditional analysis approach & object oriented analysis. **CO3**

Q.4 How to perform requirement analysis for ATM Machine? **CO3**

Q.5 How to construct a use case diagram for Food Ordering System. Explain with documentation.

CO3

Q.6 What is Activity Diagram? Explain with an example. **CO3**

Q.7 Define class model. What is the purpose of that model? C**O3**

Q.8 What is Association? Also define its classification. **CO3**

Q.9 Define Aggregation, Composition and Generalization. **CO3**

Q.10 What **is** Poseidon? **CO3**

UNIT-4

Q.1 What do you mean by object oriented analysis? Explain in detail. **CO4**

Q.2 Write the difference between conventional design approach & object oriented design **CO4**

Q.3 What is CRC? Explain with an example. **CO4**

Q.4 Construct a class diagram of any system. **CO4**

Q.5 What is state chart diagram? Explain with an example. **CO4**

Q.6 Define component diagram. What is the factor to construct that? **CO4**

Q.7 Draw the implementation diagram for course registration system. **CO4**

Q.8 Define Behavioural Modelling. Explain with an example. **CO4**

Q.9 Write down the comparisons between interaction diagram, implementation diagram & state chart diagram. **CO4**

Q.10 Explain different objectives of design in software engineering. **CO4**

UNIT-5

Q.1 What is object oriented testing concept. **CO5**

Q.2 Define testing strategies & its classification. **CO5**

Q.3 Explain white box testing & black box testing in detail. **CO5**

Q.4 Define Boundary value analysis in black box testing. **CO5**

Q.5 Differentiate between top down and bottom up integration testing. **CO5**

Q.6 What is white box testing and what is the difficulty while exercising it? **CO5**

Q.7 Discuss software testing strategies. Differentiate between Verification and Validation.

CO5

Q.8 What do you mean by system testing? Explain in detail. **CO5**

Q.9 Discuss the differences between white box and black box testing models. **CO5**

Q.10 Explain Penetration testing. Why it is used? **CO5**
